

Healing Touch Level 2

♥ Clinical Applications

Advance your Energy Healing Knowledge, Skills & Practice

Deepen your Healing Touch practice with additional healing techniques and sequences that will further develop your energy practitioner skills. In this live, interactive class, students work together in pairs to exchange one-hour long healing sessions following the 10 Step Healing Touch Sequence.

Increase your experience and confidence in doing energy healing with others. As the practitioner in the session, you will conduct an intake interview with your client, do a thorough energetic assessment and **use the information gathered to choose the Healing Touch techniques** to apply for your client's goals. You will document the full session using the standardized Intake and Session Documentation forms for effective case management with clients.

In this class you will:

- Use **active listening skills** while conducting an intake interview with your client to guide the healing techniques you will choose.
- Learn additional full body and local healing techniques, including the Spiral Meditation for **expanding the energy field for deeper healing**.
- Practice the Chakra Connection using an intervention designed to **release cellular memory** related to past physical injury.
- Apply a healing sequence to **relieve back and neck pain**, and promote healing.
- **Professionally document** your healing session for effective case management.

Prerequisite: Healing Touch Program Level 1 completion.

Facilitate deeper healing in yourself and others
